## Marks & Spencer, Kensington

Marks and Spencer have been undergoing a period of great change and development, which has led to a complete re-branding of the business. The company has been focusing much of its attention on store design, the result being a complete restructure of their stores.

Perhaps the most individual and stylish of these is the High Street Kensington store, which opened on July 31st 2000. On entering the store, a bright, yet warm and relaxed atmosphere greets you, while the overall style of the interior is undeniably modern.

Smooth wooden flooring has been introduced, space has been made a high priority, and the combination of glass and aluminium structures, supported by numerous mirrors adds to this capacious effect. Sofas and comfortable chairs are distributed throughout the store.

The Kensington store is unique not only in its design concepts but also in its services and departments. It houses Marks and Spencer's new Autograph range, as well as the coffee shop, Café Revive, a Personal Shopping Suite, a Home Shop department, a Financial Services Suite, Bureau de Change, and a New Bakery and Beauty Hall. With all these services, the style of the design remains the same – spacious, chic and contemporary. MK's electrical accessories were installed throughout the building.
